

Wire Fabrication Productivity

Dual Layer Productivity Center

There are wire fabrication machinery alternatives to the European suppliers! RWC of Bethlehem, PA represents and supports GoldenSpot Industries of Taiwan right here in North America! Instead of a Posi Wedler or Versa Welder for your wire fabrication automation, consider the GoldenSpot SA-AF dual layer multi head welder in AC or MFDC.

Impeccable Value and twice the speed!

Take a look at the GSA series of Mesh welders. Available in both AC and MFDC, precut or coil fed to suit your needs. Extremely reliable and cost effective. You now have a choice of machines supported in North America by a name you can trust

Since 1975
